

REMARKS

This Preliminary Amendment is filed in order to remedy informalities contained in the Preliminary Amendments filed on December 31, 2001 and September 10, 2003. A version of all pending claims showing the claim amendments is attached hereto for the Examiner's convenience.

Upon entry of this amendment, claims 1-21, 123-128, 136-140, 144-162, 165-170, 172-183, 186-190, 193-246 are pending in the application. Claims 1-21 have been allowed. Claims 22-122, 129-135, 141-143, 163, 164, 171, 184, 185, 191, and 192 have been canceled without prejudice or disclaimer.

Claims 22-92 were canceled in the December 31, 2001 preliminary amendment.

Claims 93-193 were added in the December 31, 2001 preliminary amendment. In the present preliminary amendment, claims 93-193 are shown with underlining to indicate that they are claims added during prosecution of the reissue application.

Claims 123, 165, 168, and 169 were amended in the September 10, 2003 preliminary amendment. Those amendments are show again in the attached "Version of Claims Showing Amendments" for the Examiner's convenience.

Claims 194-246 were added in the September 10, 2003 amendment. Also in the September 10, 2003 preliminary amendment, Applicants canceled claims 93-122, 129-135, 141-143, 163, 164, 171, 184, 185, and 191-192 in order to simplify the case for examination.

New claims 194-210 correspond to claims 1-17 of European Patent No. EP 0 740 811 B1. The EP '811 patent is the European Patent Office counterpart to U.S. Patent No. 5,732,212, which is the basis of the present reissue application. Claims 194-210 have been modified to conform to U.S. practice. A copy of EP 0 740 811 B1, showing the allowed/granted claims, is

attached to the September 10, 2003 preliminary amendment. Applicants respectfully submit that claims 194-210 are patentable.

New claims 211-246 were formerly pending in U.S. Patent Application No. 09/401,501 as claims 11, 13-41, 43, 44, and 48-51. The '501 application is owned by the same assignee as the present application. During prosecution of the '501 application, claims 11, 13-41, 43, 44, and 48-51 were rejected under 35 U.S.C. § 102(b) as being anticipated by U.S. Patent No. 5,732,212, which is the basis of the present reissue application. Thus, in the '501 application, the U.S. Patent Office has taken the official position that claims 11, 13-41, 43, 44, and 48-51 of the '501 application (*i.e.*, claims 211-246 of the present application) are fully-disclosed and enabled by the present application. Accordingly, these claims are being presented in this application for further examination based on the Patent Office's position that the claims are enabled by the '212 patent specification.

The Examiner has contended that the '212 specification does not describe and enable the "switch" claim elements. The applicants have canceled claims 99, 100, 108, 109, 129-135, 141-143, 163, 164, and 171 which variously recited the objected to "switch" elements. Thus, the section 112 rejection of these claims is now moot.

The following identifies exemplary specification support for claims 123-128, 136-140, 144-162, 165-170, 172-183, 186-190, 193-246. Several embodiments in the specification support the present claim language. Only exemplary embodiments are used to illustrate the support that can be found throughout the specification for the claim language. The exemplary support for claims 211-246 comes from the Examiner's office action in the '501 application. The exemplary support for claims 211-246 was used by the Examiner in the '501 application to support the Examiner's rejection of the claims in that application. The following representations
